

More Than This

Ok maybe we had too much to drink the other night
maybe some things happened that wouldn't have otherwise
Like when you pulled me close and kissed my lips for the first time
Or when we fell asleep connecting dots up in the sky

Ok things went back to normal conversation the next day
But I'm still holding on to this emotion I can't shake
They may say I'm drunk in love
But how come I still felt it when I sobered up?

*Can I convince you to walk through that door
Cause this time I know that we're more more more*

**We're more than just that night
We're more than just that kiss
Let's give it a try
Cause I know we're more than this**

**We can be like shooting stars
Take my hand, the sky is ours
Cause I gotta make you see
That what you need is me**

Ok I found you in my dreams, but I don't like to admit
I'm wrapped around your finger like a ring of promises
My heart is on your keychain and you're driving me insane
Just let me take the wheel and show you what it feels like

*Can I convince you to walk through that door
Cause this time I know that we're more more more*

**We're more than just that night
We're more than just that kiss
(yeah) Let's give it a try**

Cause I know we're more than this

**We can be like shooting stars
Take my hand, the sky is ours
Cause I gotta make you see
That what you need is me**

*I know we all got flaws
But I can't find yours
You party so hard core
But you can rock suit and tie yeah
I got a taste of you
But now I want it all
Let me be your star in the dark*

**We're more than just that night
We're more than just that kiss
(yeah) Let's give it a try
Cause I know we're more than this
(double this?)**

**We can be like shooting stars
Take my hand, the sky is ours
Cause I gotta make you see
That what you need is me**

Ok.
